How to Determine Your Column:

1. Select your family size.
 2. Look at the income descriptions for that row and pick the column that is most accurate.
- For example, if you have a household of 4, start by asking yourself, "Is our household income (AGI) under \$46,676?" If so, stop there. If not, proceed to the next column to the right, and ask, "Is our household income under \$70,013?" Percentile (State Median Income)-->

Family Size		50	75	100	125	175	
		Column A	Column B	Column C	Column D	Column E	Column F
		Under	Under	Under	Under	Under	Over
2	----->	\$31,740	\$47,609	\$63,479	\$79,349	\$111,088	\$111,088
3	----->	\$39,208	\$58,811	\$78,415	\$98,019	\$137,226	\$137,226
4	----->	\$46,676	\$70,013	\$93,351	\$116,689	\$163,364	\$163,364
